

Netlife PhotoSuite Pro - tutorial

This tutorial describes how you can use Netlife PhotoSuite Pro to solve the following case:

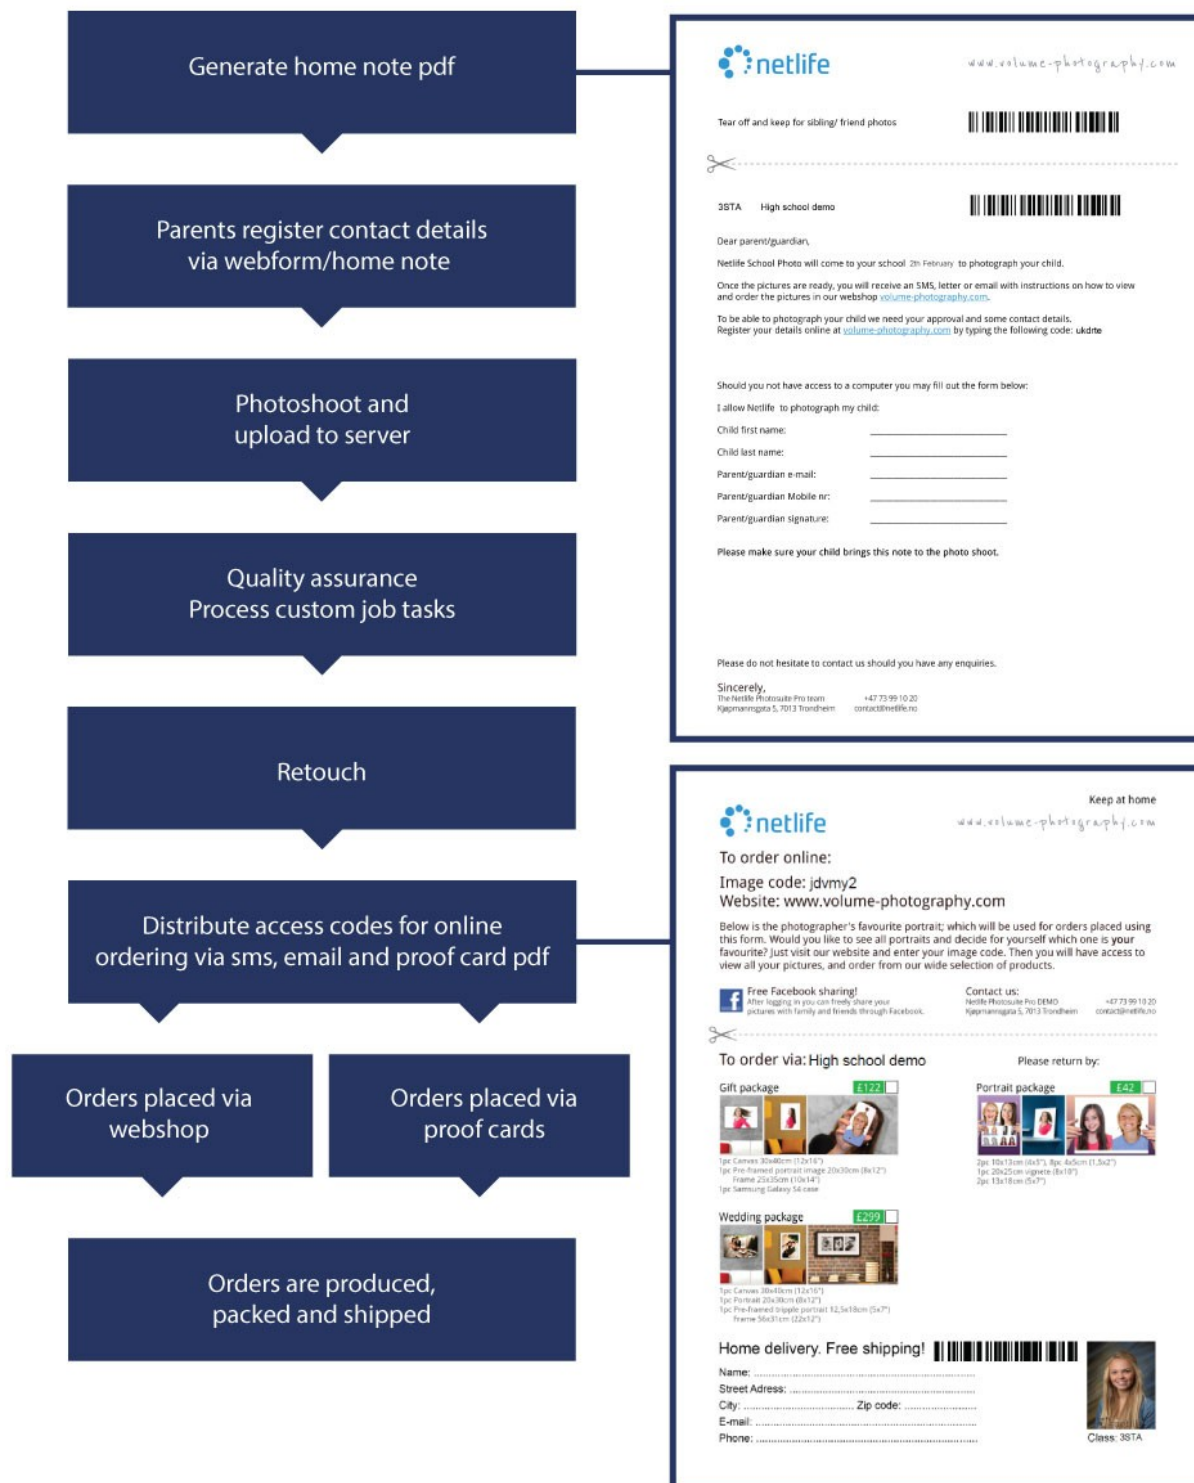

- Individual portraits for students and staff.
- Group photo for primary group and subgroups.
- Group photos containing subject names.
- Sibling/friend photo.
- Several photographers at the same job.
- ID card - image export with meta data.
- School database - image export using presets.
- Hard copy yearbook sale and export.
- Free group picture staff.
- Free digital portrait staff children + discount voucher.
- Enable time limited bulk shipment for school pickup and home delivery.
- Proof cards in combination with online sales.
- Outsourced image retouch.
- Production workflow.

*Field operation in New Zealand were they shoot a class in approx. 6 minutes.
The biggest school with 3146 subjects was done in two days.*

System overview (if subject name/contact details are missing):

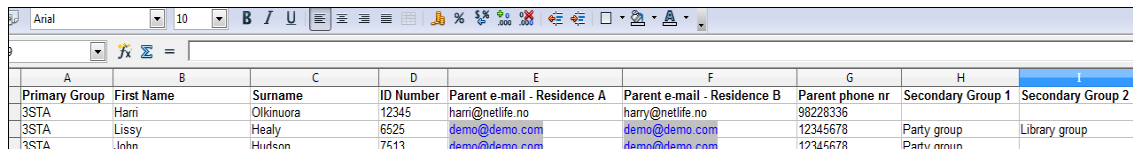

JOB WORKFLOW

How to create new Job: (webadmin)

With subject info:

If you receive a data sheet (.csv or Excel file) with subject info, you upload the file in webadmin when you create a new job.

	A	B	C	D	E	F	G	H	I
	Primary Group	First Name	Surname	ID Number	Parent e-mail - Residence A	Parent e-mail - Residence B	Parent phone nr	Secondary Group 1	Secondary Group 2
	3STA	Harri	Oikinuora	12345	harri@netlife.no	harri@netlife.no	98228336		
	3STA	Lissy	Healy	6525	demo@demo.com	demo@demo.com	12345678	Party group	Library group
	3STA	John	Hudson	7513	demo@demo.com	demo@demo.com	12345678	Party group	

An administrator will create the new job using our web based admin system. (www.domain/admin)

He/she will upload the data sheet, allocate the job to the assigned photographers and select job type.

The system can be used for all types of photography from baby photo to events. The jobtype settings will activate automated features/settings and take care of the "sales process". Sample of presets are code distribution, reminders, products packages, price lists etc.

After uploading the name list you then tag each column using drag and drop, since the list can be different from time to time.

Tear off and keep for sibling/ friend photos

3STA High school demo

Dear parent/guardian,

Netlife School Photo will come to your school to photograph your child.

Once the pictures are ready, you will receive an SMS, letter or email with instructions on how to view and order the pictures in our webshop volume-photography.com.

To be able to photograph your child we need your approval and some contact details.
Register your details online at volume-photography.com by typing the following code: ukdrte

Should you not have access to a computer you may fill out the form below:

I allow Netlife to photograph my child:

Child first name: _____

Child last name: _____

Parent/guardian e-mail: _____

Parent/guardian Mobile nr: _____

Parent/guardian signature: _____

Please make sure your child brings this note to the photo shoot.

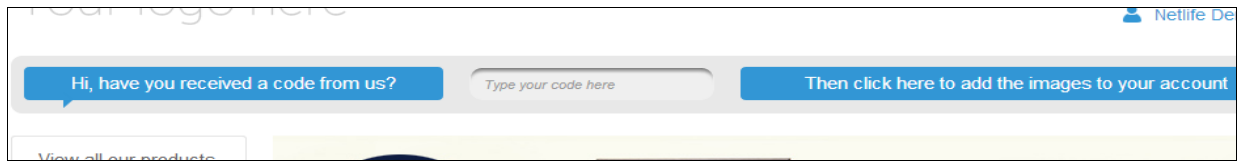

Please do not hesitate to contact us should you have any enquiries.

Sincerely,

The Netlife Photosuite Pro team
Kjøpmannsgata 5, 7013 Trondheim

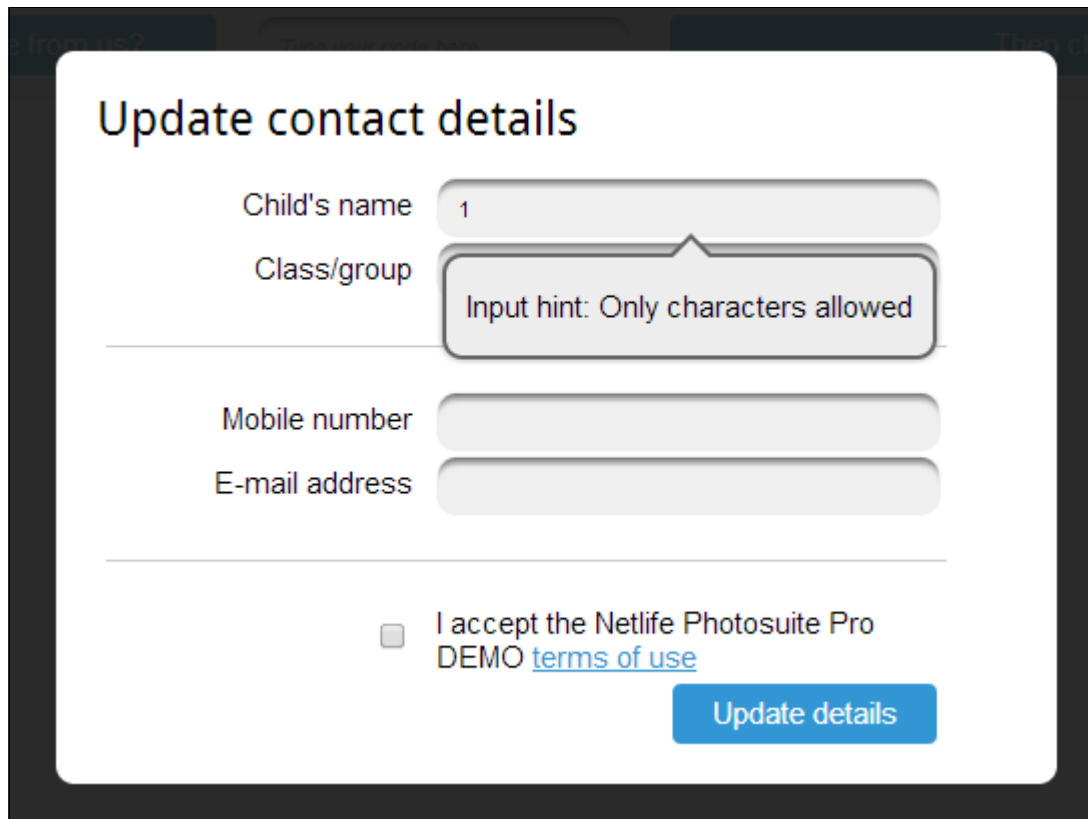

+47 73 99 10 20
contact@netlife.no

Parents register their kids name and contact details using the webform. The webform will be activated automatically by typing in their code (if web registration form is activated and the job is not set to status 9- webshop):

Hi, have you received a code from us? Then click here to add the images to your account

[View all our products](#)

Update contact details

Child's name

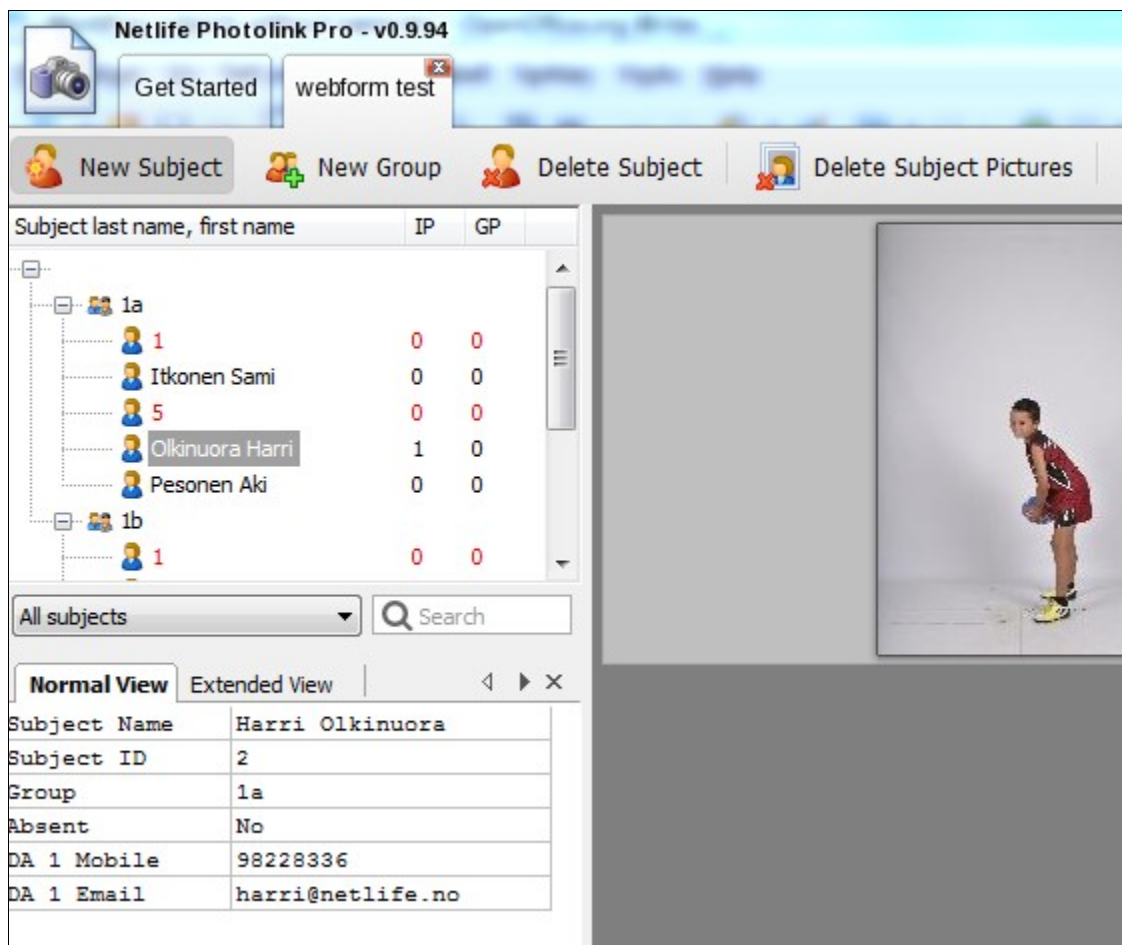

Class/group

Mobile number

E-mail address

☐ I accept the Netlife Photosuite Pro DEMO [terms of use](#)

The photographer download the job file in the morning before the photoshoot, so he get the latest updates of the worklist.

Subjects that have registered online will be displayed with their name in the jobfile and the photographer know that this subject can be photographed, even without the note.

The subjects bring their home note to the photoshoot.

The photographers scan the barcode and take pictures of the subject using tethered shooting.

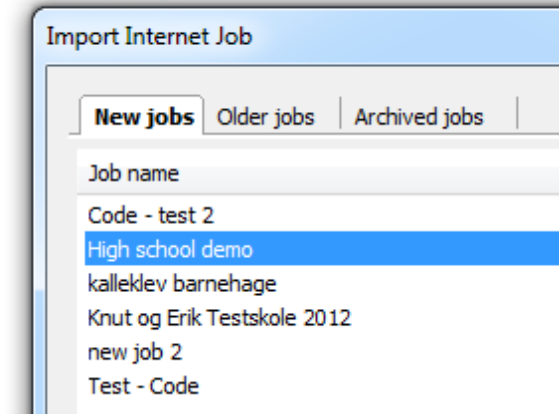

For friend/sibling photo the photographer rip of the top piece of the note and give it back to the subject. When they come back for their second shoot, the photographer scan all codes so that all subjects are tagged in Photolink for automatically mapping. (press the ctrl button)

PS! You don't need to scan barcodes if the webform is the only option for registration. You then ask for the subject name on the photoshoot to map the right subject to the pictures. This will save you a lot of time and manual labor for registration of the hand written forms.

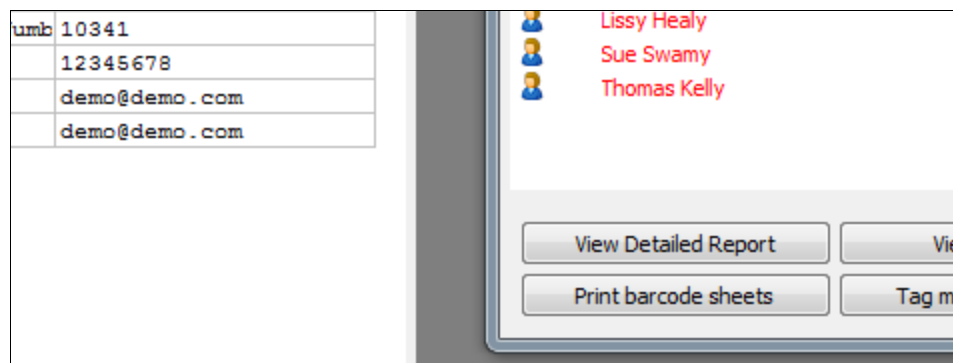

Photoshoot: **(Photolink Pro)** Introduction video: <https://www.youtube.com/watch?v=jZB99g-LCGw>

The assigned photographers can fetch and download their job info from the field operation software, Netlife Photolink Pro.

NETLIFE PHOTOLINK PRO

We recommend to print a barcode sticker sheet and ask the teacher to place the barcode on the back of the subjects jacket, so you don't have to ask for the subject name for each subject.

3STA
Adrian Prinsloo

3STA
Ethan Hutchinson

3STA
Harri Olkinuora

3STA
John Hudson

3STA
Lisbeth Miller

3STA
Lissy Healy

The photographers use a barcode scanner to scan the subject barcode to map the subject. We recommend to use tethered shooting, storing the images directly on the laptop using your camera software etc. EOS Utility.

(We also recommend instant backup on an usb stick in case the laptop crashes).

Free hand shooting with QR code mapping can also be used. Then you print QR codes in stead of bar codes and take a picture of the QR code before you take the photos of the subject. The images are imported using the import feature in Photolink Pro. You are also able to use drag and drop.

Subject tagging:

Photographers favorite:

The photographer select the best portrait. This picture will be used as default image on the webshop products, proof cards and packages sent home on speculation.

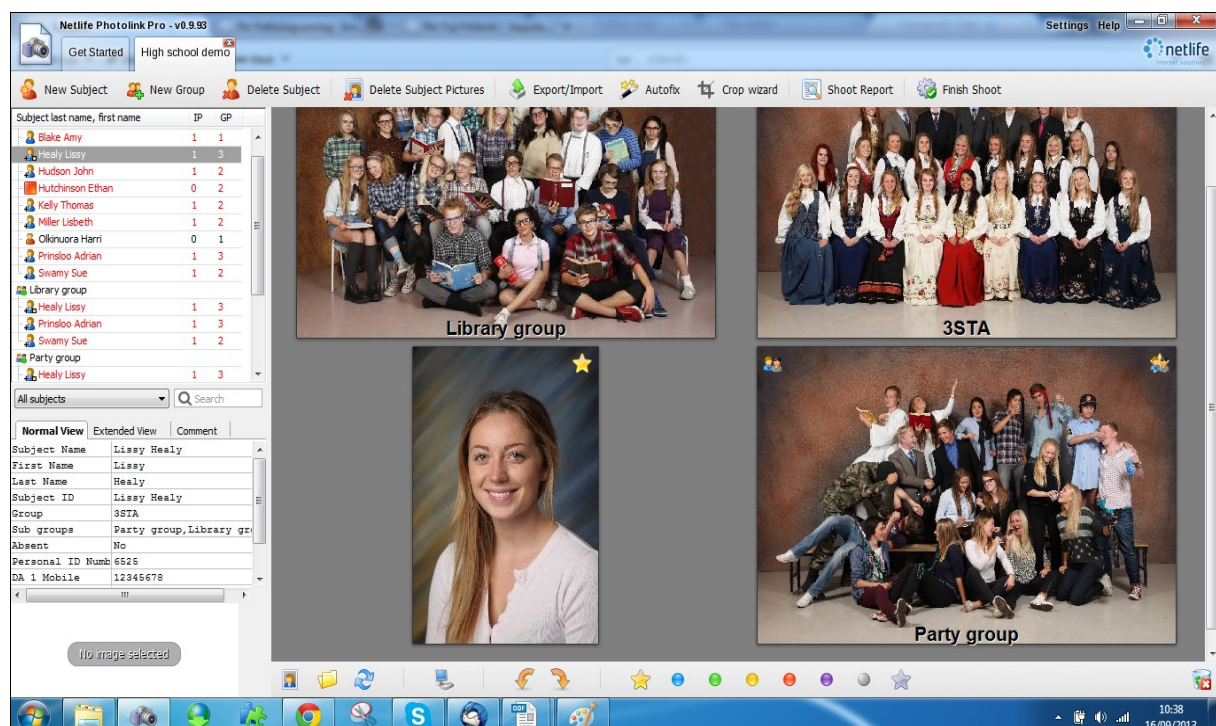

Absent subjects:

The photographers tag absent subjects by double click on the subject. A red box will appear. You can print a summary of absent subject post shoot and give to school. You are also able to create a short list in Photolink Pro for the second shoot day.

Staff:

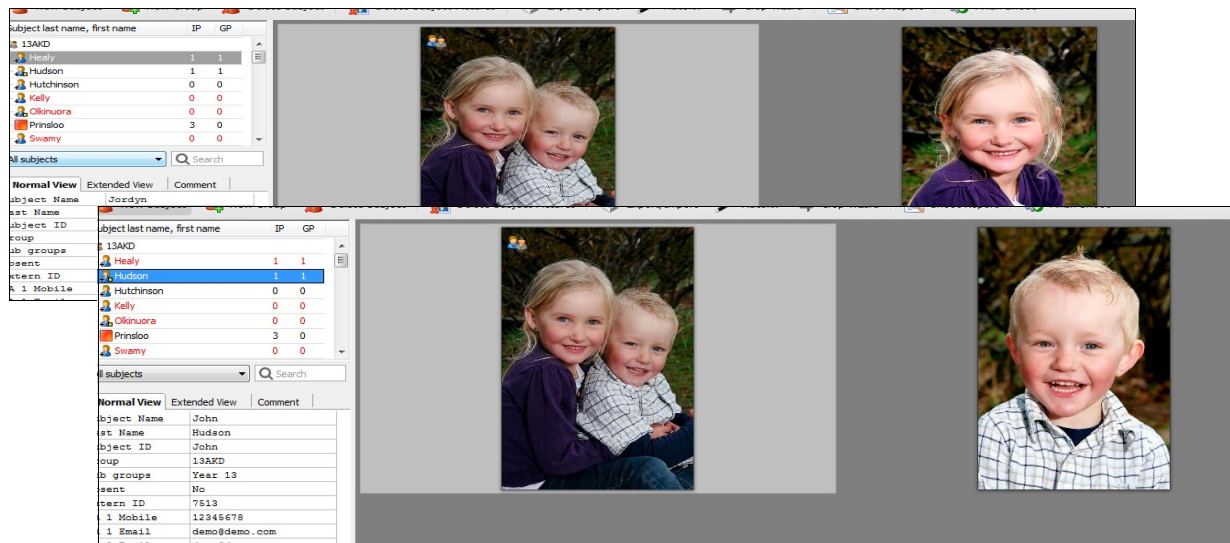

To tag staff, you right click and select “Set subject role” and then “STAFF”. Subject with this tag will be treated separately in the system when creating free products etc.

All subgroup pictures are mapped and tagged automatically.

Sibling photo:

Sibling/friend photos are done by selecting the subjects who will share the same image(s) and the mapping will be done by the system. (use ctrl button when selecting multiple subjects)

Group photo:

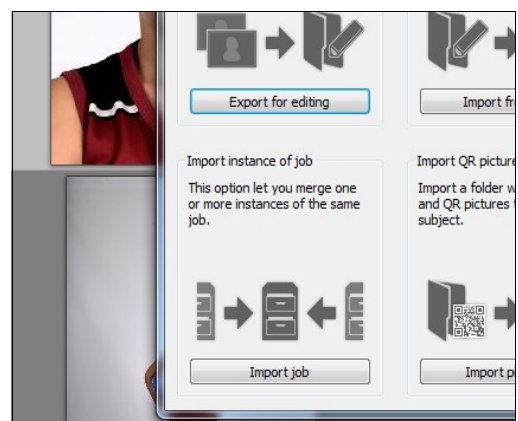

To allocate the group photo to all subjects, you mark the group name before taking the group photo pictures. You will see that all subjects will now have a number equals the number of GP (group pictures) and IP (individual pictures).

The best group picture need to be tagged. This is done by selecting the best image and right click. Then you select the option “Set as group picture”. This group picture will be selected as default image on the group picture templates.

Subject and group picture tagging is normally done post shoot, to maintain focus and high speed on the photoshoot.

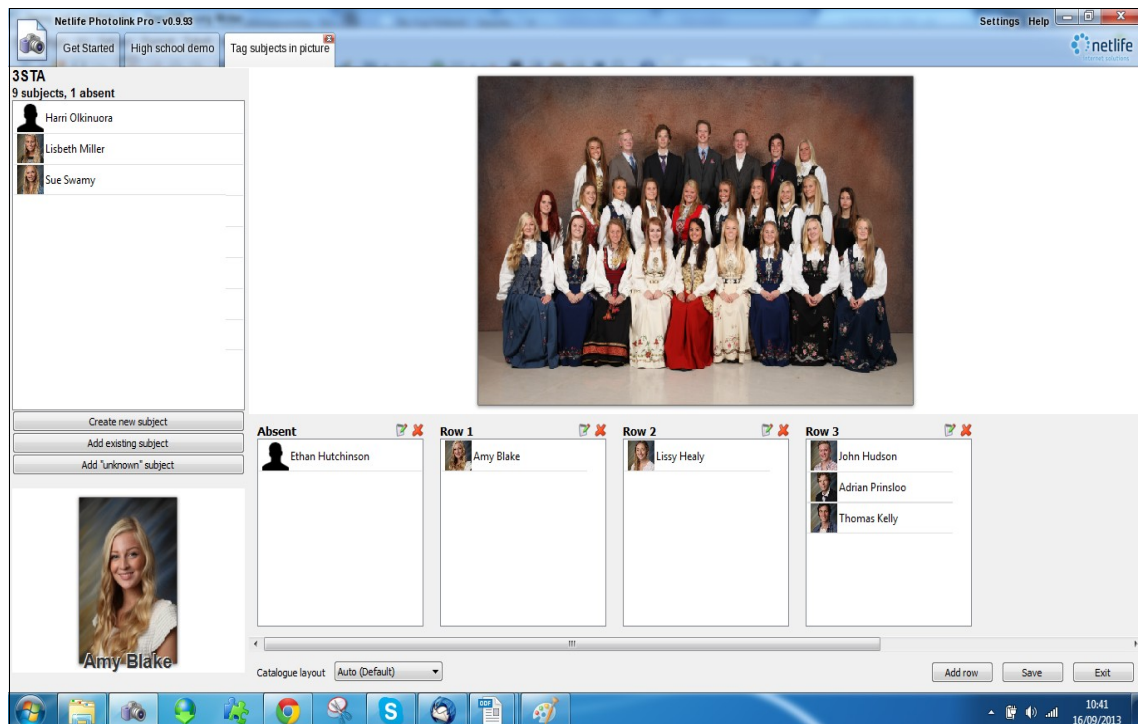

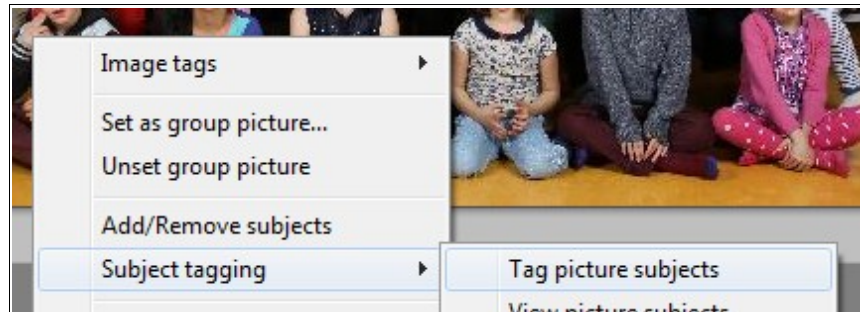

Post shoot - photographer:

Post shoot the photographers can use the merging feature in Photolink to load all data/images into a master PC when working in team. Each photographer can also upload their part of the job and the merging will be done automatically on the server.

Group picture naming:

You are able to name tag the group photo by drag and dropping each subject into the right row and place. The system supports printing the names automatically on the group photo template. You also need some space bellow the subjects for placing the names. This feature is enabled by right clicking on the group picture and select "Tag picture subjects".

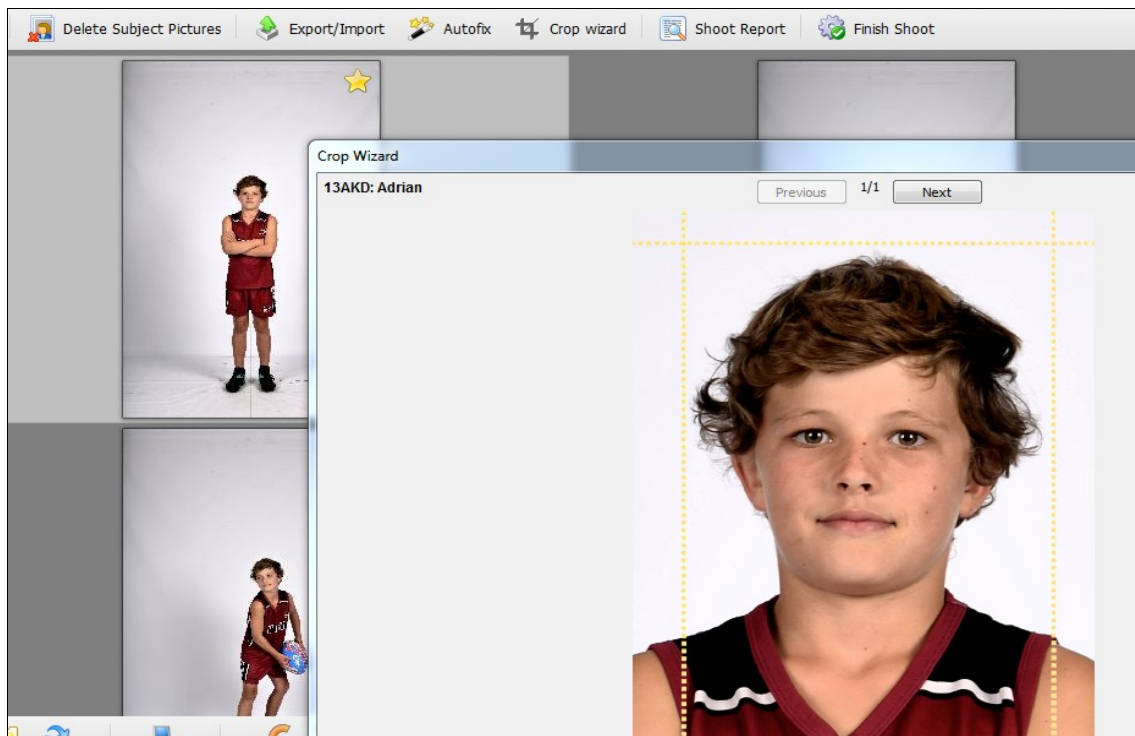

Please notify Netlife if you would like to use this feature, since we need to allocate templates for this product.

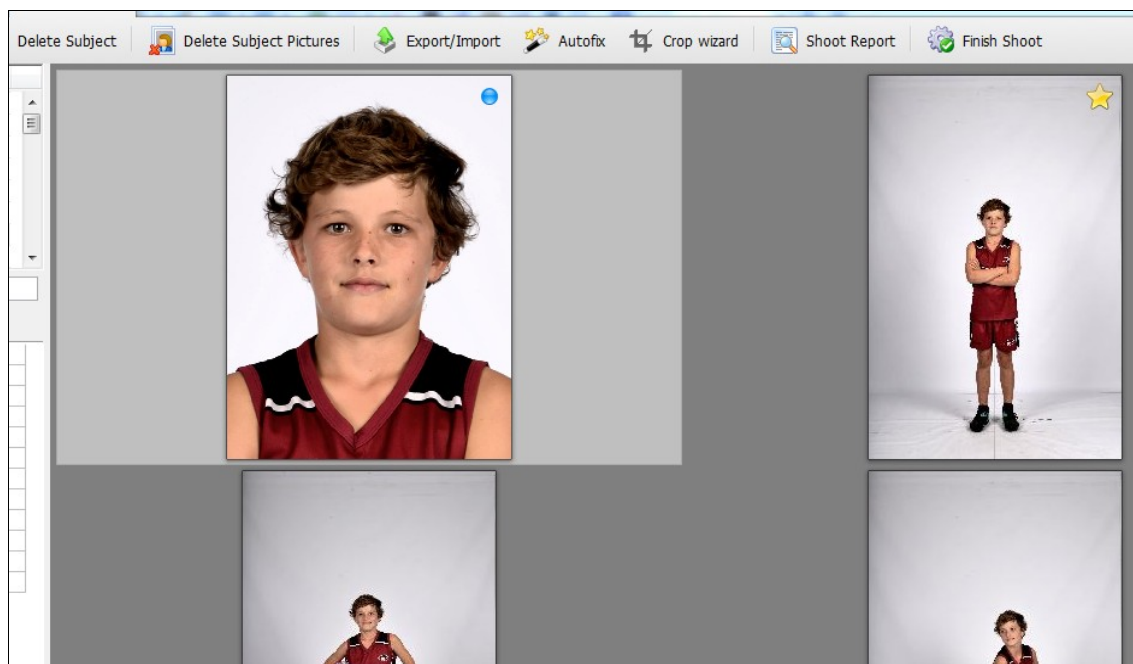

ID card export with autocrop:

Netlife Photosuite Pro has a face recognition feature that enable you to batch process the cropping to create ID cards based on image ratio requirements. The batch cropped images can be exported with meta data for ID card creation or be used for general school database. You enable the feature by pressing the “Crop wizard” button in Photolink Pro.

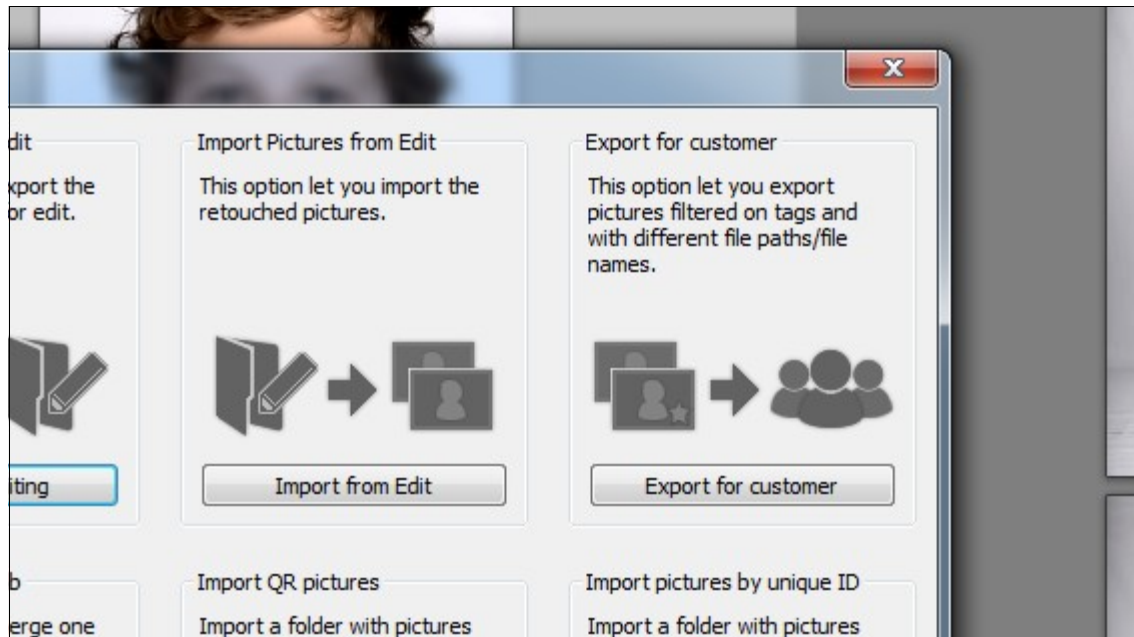

The system will detect the subject's head and place it inside the grid based on your settings.
Fine tune manually with a mouse if required.

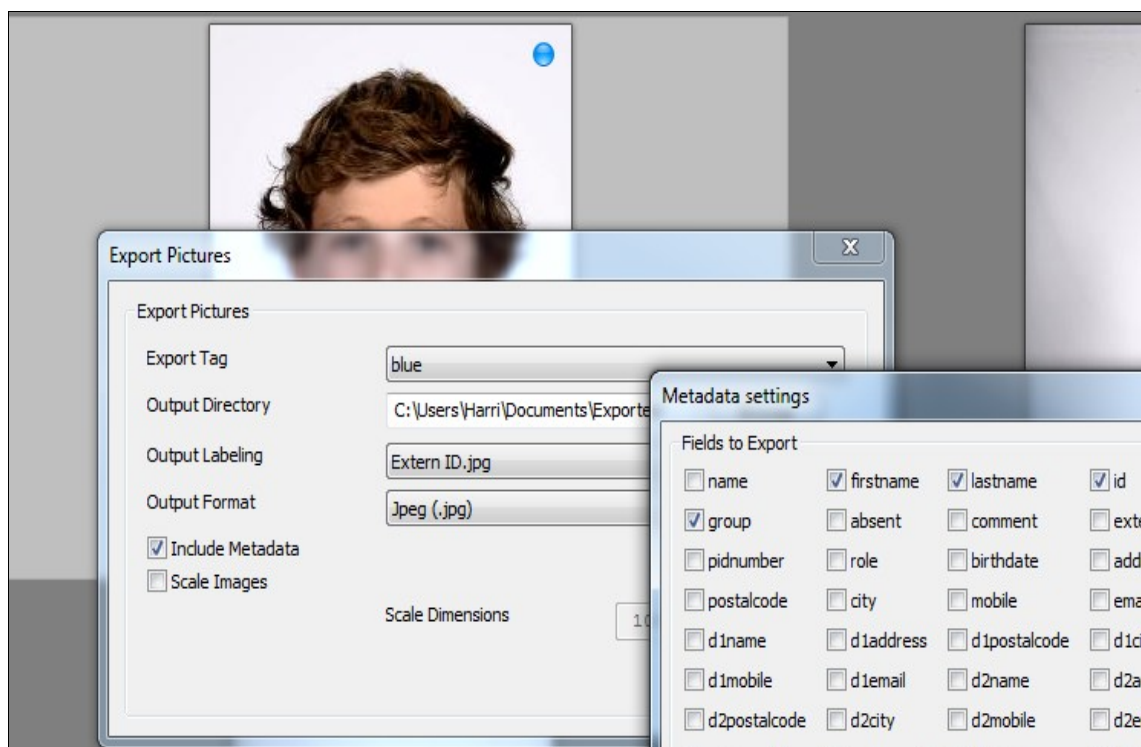

The cropped image will be copied to each subject with a selected output tag.

Use the export feature to store the cropped images into a selected folder.

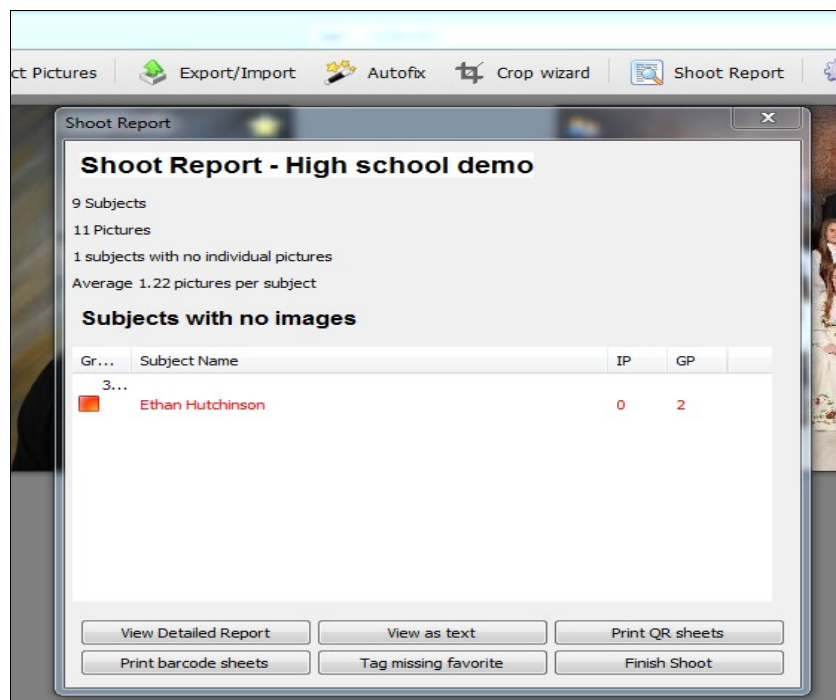

Select the required metadata, scale dimensions and labeling.

Quality assurance and upload:

When the photographer is ready, he run a shoot report in Photolink Pro as a quality assurance.

'When everything is ok, he upload the job to the server.

Upload queue

Job Name	Status	Action
High school demo	File Progress <div><div></div></div> <div>(24.94 KB/s)</div> <div><div></div></div> <div>(24.94 KB/s)</div> <div>Total Progress <div><div></div></div><div>Uploaded 0 of 11 files (0.05MB/s)</div></div>	<div></div> <div>A</div>

Post shoot – job administration: (webadmin)

Once the pictures are uploaded, the administrator will see that the job status has changed to 4) Uploaded by photographer, and move it to the next status, which is 5) Checkpoint.

Administration : Pro Photo: Jobs

Job list

Create new job

6) Ready for retouch	5
7) Retouch complete	1
8) Ready for webshop	
9) In webshop	6
10) Archive	

Checkpoint is a quality assurance system where red tabs indicate missing info and the administrator can easily make corrections etc. In this case the photographer has forgot to tag 2 subjects with the favorite (gold star) tag. You just click on the tab and select the best picture and the tab will change color to green when everything is done.

Checkpoint is also used to order free group photo for the staff, giving access to our school web archive system and to tag the free digital copies for staff children.

<hr/>			

Our school web archive system is auto generated once the job is uploaded. The webadmin access code is sent automatically to your school contact's email address, when the job has to status 9- In webshop.

You find more info on this system on <http://www.volume-photography.com/webarchive>

Detailed tab:

The detailed tab feature will give you an overview of the images that will be displayed in the webshop. Hover with your mouse and a menu of options will be shown, for you to take action.

Images you will keep, but not show to the customer, can be shut of by clicking on the light bulb.

Click the 'free digital copy' tag for images that you would like to give away as free download.

The screenshot shows the 'Detailed' tab selected in a navigation bar. The navigation bar includes tabs: Oppsummering, Favorite, Gruppebilde, Levering (1), Tagging (2), Archive (1), Absent, and Detailed. Below the navigation bar, there is a search bar labeled 'Search subjects' and two buttons: 'Go to verify pictures mode' and 'Mark this group's pictures for forced retouch'. Below these buttons are two tabs: '4b' (selected) and '5a'. The main content area displays a grid of images. The first row shows four individual portraits of a young woman. The second row shows four images: the first is a full-body shot of the same woman, and the next three are smaller portraits. The third row shows two images: a portrait of the woman and a group photo of several children. Each image has a light bulb icon in the top left corner and a 'netlife' watermark. The group photo is labeled '4b'.

The free digital copy will be added automatically under the “my page” section in the webshop, and the file(s) can be downloaded as a .zip file.

Discount voucher:

Make a rebate/voucher code with 50% discount for the staff.

The discount will be credited in the shopping cart when used. Different types of discounts are supported. You enable this feature to type in www.domain/admin/portal/rebatecampaigns.php

Portal Settings				
Administration : Rebate campaigns				
Rebate code	From	To and including	Rebate	Action
2jwObvSC	2013-08-16	2014-08-16	0.5	Edit Delete
GnKMvlek	2013-09-03	2014-09-03	1	Edit Delete

PS! You need to communicate this manually and individually.

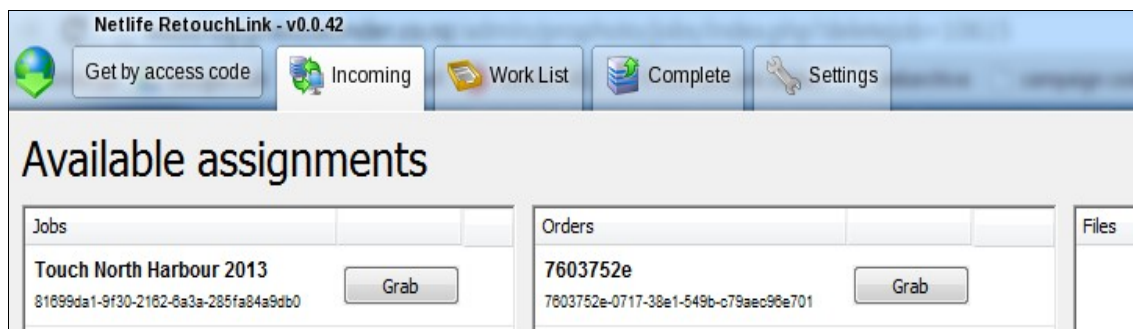

Retouch: **(Retouch link)**

Go to <http://docs.netlife.no/retouchlink.pdf> for detailed description of Retouchlink.

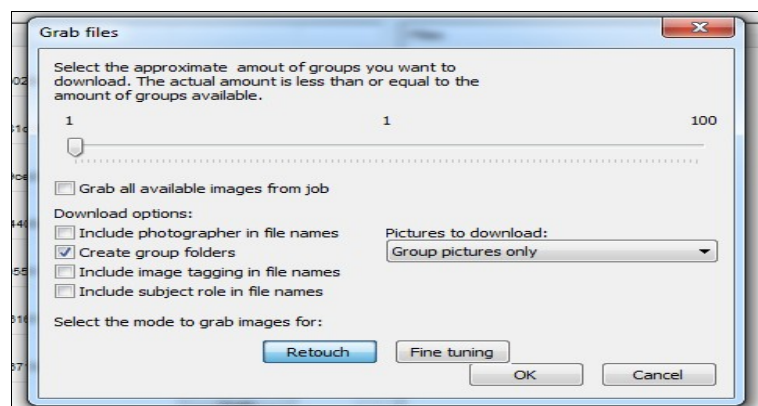

The next step in the process is to send the images to retouch by selecting the retoucher(s) for this job. (outsourced or internal retouch)

The allocated retoucher(s) will fetch and download their jobs/orders using the Netlife Retouch link.

When the images have been fine tuned in Photoshop/Lightroom etc. the retouchers upload the files.

You may assign several retouchers to each job and they can easily share the work. One retoucher may do the group photos and the rest may share the fine tuning of portraits.

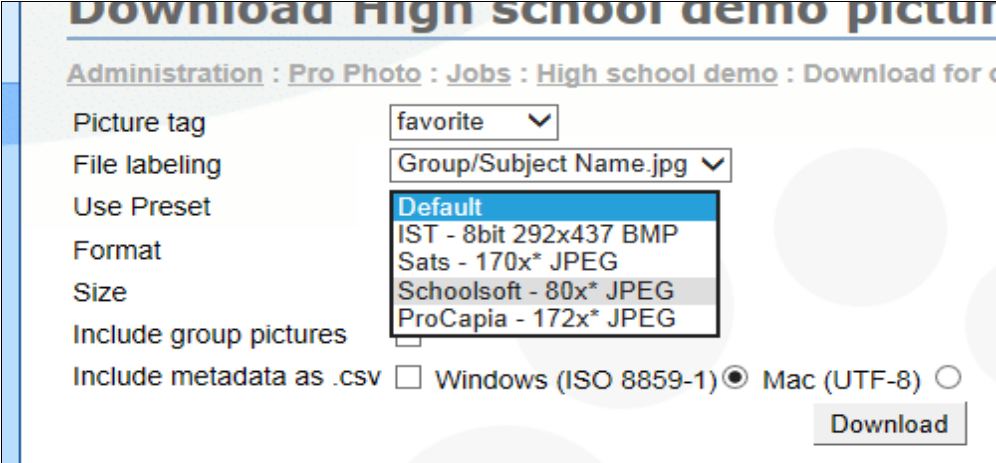

Once the retouchers are ready, the job will change status to 7) Retouch complete and the administrator can export images for year book/ school database and launch the job changing the status to 9) In webshop.

PS! Image enhancement can also be done automatically in PhotoLink Pro, using a third party software plugin named Perfectly Clear Lab and is provided by Athentech Imaging inc.

Export images/data for school administration systems:

The feature is available on the job menu. Just click on the “Export pictures for customer” link.

Use the presets to export school database info etc. SIMS, Serco and Phoenix.(presets are added based on requests)

Download High school demo pictures

Include metadata as .csv ☐ Windows (ISO 8859-1) ☒ Mac (UTF-8) ☐

Export images for year book creation:

The feature is available on the job menu. Just click on the “Download pictures for catalogue” link.

You can use presets if your selected year book creator software is supported. If not, you just mark the required options in the list.

The screenshot shows a web form titled "Download Demo school pictures". At the top, there is a breadcrumb trail: "Administrasjon : Proff foto : Jobber : Demo school : Download c". The form is organized into several sections, each with a bold heading and a list of options marked with checkboxes:

- Use preset**
 - ☐ Download for EBI Skolkatalogproduktion
- Which pictures to download**
 - ☐ Create own group picture folder
 - ☐ Group pictures only
 - ☐ Download scaled pictures with watermark
- Subject tagging**
 - ☐ Include job name in tagging
 - ☐ Include group name in tagging
 - ☐ Disable subject number in row
 - ☐ Disable newlines after row name and between rows
- Embed metadata**
 - ☐ Embed metadata in images
- Hidden identity**
 - ☐ Include portrait pictures of hidden identity subjects
- Download all pictures for subject**

The administrator adds the hard copy version of the yearbook by naming it and defining the price and weight (weight information is only applicable if you are using the automatic postage calculation system). The yearbook offer will be displayed in the webshop and also as a pop up when leaving the shopping cart.

PS! It is possible to offer an online yearbook by uploading the images to a dummy subject and give access by adding the id.

Enable school pickup:

To enable time limited school pickup, type the expiry date for this delivery option. Postal delivery is default on this job.

Webarchive access key	<input type="text" value="waup9jj"/>
School pickup expire	<input type="text" value="2011-05-29"/>
Comment	<input type="text" value="-free group picture
staff
-free digital portrait
staff children +
off - voucher"/>
Info text 1	<input type="text"/>
Info text 2	<input type="text"/>
Enable green screen	<input type="checkbox"/>
<input type="button" value="Save Changes"/>	

Launch the job:

Once added to the webshop (status is changed to 9- In webshop), all the automated features/settings will take care of the "sales process".

Code distribution (sample of presets if contact details are available):

Email/SMS:

Step 1. An email with a access code to the images (pr subject) is sent automatically.

Step 2. One day later a SMS is sent to those who have not used the email access code.

Proof card:

The proof card pdf is auto generated and sent to the email address to person responsible for printing and sending these to the schools. He can also forward the email for local printing and distribution in the school.

If any of the delivery methods above are missing, the system supports running an automatic search for the subject and merge old data and contact details from previous jobs.

Production: (Lablink)

Go to <http://docs.netlife.no/lablink.pdf> for detailed description of Lablink.

Orders are automatically downloaded, processed, and made ready for production. Lablink comes integrated with a wide range of lab and invoicing systems. Lablink will also output a XML, and an open API makes it easy to integrate your own production and invoicing systems etc. E-conomic.

We add new products to the system when requested by our partners, and the list of products already contains hundreds of products. Our advanced order routing system allows everyone to offer everything. The order is split on the server, and sent automatically to the correct producer. Prolabs are also able to serve several customers/portals, using the same Lablink license.

The screenshot displays the Lablink 2.9.11 application window. The interface is divided into several sections:

- Sections:** Includes 'Incoming', 'Order View', and 'Finished' buttons.
- Lablink Log:** Shows a list of events, such as '12:58:16 Lablink loading...' and '12:58:19 Lablink loading completed'.
- Order List (1 orders selected):** A table with columns: Status, Date, Order, Lab nr, Payment, Delivery, Partner, Loc..., Has CD, and A. It lists various orders with their respective details.
- View Order:** A detailed view of a selected order, showing 'Comes from', 'Confirm Time', 'Size', 'Delivery Time', 'Customer Information', and 'Order Dispatch / Pickup'.
- Image Enhancement:** A section at the bottom left with a message: 'You are not using image enhancement. Learn more about that [here](#).'
- Buttons:** Includes 'Delete Order', 'Reprocess', 'Print Receipt', and 'Complete Order'.
